CEMENT LTD.

JK ORGANISATION

A BEDROCK OF A STRONG FOUNDATION

- ▶ Turnover of over \$ 4.0 billion
- ▶ Sales and service network of 10,000+ distributors and retailers
- ▶ Footprints across 6 continents and over 100 countries
- ▶ Multi-business operations
- ▶ A team of 40,000+ committed employees
- ▶ 47 manufacturing facilities across India
- ▶ A strong orientation towards innovation and R&D
- ▶ Committed to excellence
- ▶ Driven by a mission to serve the society with integrity, fairness and trust

JK Organisation is a global industrial conglomerate headquartered in India, with a legacy spanning over 140 years. The prestigious group operates across multiple industries, products, and locations, with a presence in numerous countries worldwide.

The name JK Organisation pays tribute to Late Lala Juggilal Ji Singhanian and his son, Late Lala Kamalpat Ji Singhanian. Motivated by the ideals of Mahatma Gandhi's Swadeshi movement and a desire to build an Indian enterprise, Late Lala Kamalpat Ji Singhanian founded JK Organisation, marking the dawn of a new industrial era in India.

The products of the JK Group are well-recognized and hold a significant share in their respective markets. The group's strong brand reputation has been built on cutting-edge technologies, continuous research and development, and innovation. It has established renowned research and development centers across various fields.

The organisation's consistent efforts and contributions toward building a prosperous and socially strong India are widely acknowledged. Today, JK Organisation stands as one of India's leading business entities and a pioneer in promoting a robust and self-reliant India.

” VISION

- ▶ To be the most trusted brand providing innovative building solutions, delivering excellence and unparalleled stakeholder experience by empowering human capital and harnessing the power of technology.

” MISSION

- ▶ To foster inspired human capital and deliver best-in-class customer experience to achieve a turnover of INR 30,000 Crore by 2030.
- ▶ To be in the top three companies in our industry in terms of EBITDA per ton margins, leverage our digital capabilities to drive growth and create long-term value for our stakeholders.
- ▶ To develop innovative solutions with a compelling value proposition, expand asset footprint, and venture into new business opportunities contributing 40% of the business.
- ▶ To embrace sustainability for our shared future.

JK LAKSHMI CEMENT Ltd.

A PROMISE FOR CONSTRUCTIVE DEVELOPMENT

JK Lakshmi Cement Ltd., a member of the prestigious JK Organisation, is a renowned and well established name in the Indian Cement industry from over three decades.

JK Lakshmi Cement is relentlessly focused on product quality, customer satisfaction and innovation. This has helped it push the boundaries and tap the immense potential for development in the infrastructure and construction sectors of the country. Right from gaining foothold in the new and emerging markets in the country to invest in the latest R&D, the company has continued to be a resilient performer despite the constantly evolving challenges of the cement sector.

JK Lakshmi Cement Ltd. has a wide product portfolio catering to the varied construction requirements of the discerning customers. It is our endeavour to become a complete solution provider to the customer looking to make his dream home.

The product range includes an array of cement products like Ordinary Portland Cement, Portland Pozzolana Cement, Portland Slag Cement and newly introduced Composite Cement. In addition to cement products, the company provides a host of value-added products and services viz. ready-mix concrete, gypsum plaster, wall putty, autoclaved aerated blocks, construction chemicals and adhesives.

It is the brand of choice across all sections of customers such as housing projects, roads and bridges, airports, factories as well as Individual House Builders (IHB).

Jaykaypuram, Sirohi (Rajasthan)

MANUFACTURING UNITS

JK LAKSHMI PLANTS - BACKED BY HOLISTIC EXCELLENCE

Started in 1982, JK Lakshmi Cement Ltd. has modern and fully computerized, integrated cement plants at Jaykaypuram (Sirohi), Ahiwara (Durg) in Chhattisgarh.

Udaipur Cement Works Limited, a fully owned subsidiary of the company, has a state-of-the-art cement plant located in Dabok (Udaipur, Rajasthan).

The company's grinding units are located at Moti Bhoyan in Kalol (Gujarat), Jharli in Jhajjar (Haryana), Palsana in Surat (Gujarat) and Cuttack (Odisha).

Positioned amongst the least cost producers in the industry, the operating parameters of the company are at par with the international standards.

In addition to these cement plants, 12 units of RMC Plants are located in NCR, Rajasthan, Gujarat and Punjab. The company's AAC block plant is located in Jhajjar (Haryana).

The background image shows a massive concrete bridge with multiple levels of overpasses and ramps, curving into the distance. A white cement truck is visible on the right side of the frame. The text 'RANGE OF CEMENT PRODUCTS' is overlaid in large, bold, yellow capital letters, enclosed within a yellow rectangular border. There are also yellow diagonal lines in the top-left and bottom-right corners of the border.

RANGE OF CEMENT PRODUCTS

OUR PORTFOLIO

CEMENTING THE FOUNTAINHEAD OF THE COMPANY

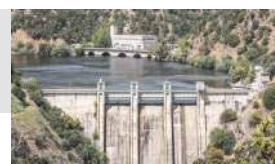

ORDINARY PORTLAND CEMENT

JK Lakshmi Cement produces Ordinary Portland Cement (OPC) in two grades i.e. 43 and 53. OPC is one of the most popular building materials used all across the globe. While the chief chemical constituents of Ordinary Portland Cement (OPC) are calcium, silica, alumina and iron. Cement manufacturers continuously research and make efforts to further strengthen and improve the quality and other features of this particular type of cement.

PORTLAND POZZOLANA CEMENT

JK Lakshmi Cement has developed technology to produce high strength, high performance blended cement like Portland Pozzolana Cement (PPC) using fly ash (a thermal power plant waste) as a raw material. The company provides - Portland Pozzolana Cement of superior quality, that is known for achieving higher early compressive strength and fineness. It is used as a safer and eco-friendly alternative to Ordinary Portland Cement. We have introduced PPC in premium segment that is ideal for all concrete applications like columns, beams, roofs and foundations.

PORTLAND SLAG CEMENT

Ground Granulated Blast Furnace Slag (GGBS) is a by-product from the blast furnaces used to make iron or steel. JK Lakshmi Cement produces high quality Portland Slag Cement by grinding the slag with the clinker. Durability, long term strength, sulphate and chloride resistance of PSC is found to be better than other types of cement. Usage of slag cement keeps materials from landfills, reduces virgin material use, enhances air quality and reduces energy consumption by replacing other higher-impact materials.

COMPOSITE CEMENT

Homogeneous blending of highly reactive fly ash, high glass content slag and high-quality clinker results in this modern product resulting in numerous benefits to the customers and society at large. Composite Cement produced by JK Lakshmi Cement has resistant properties from alkaline and sulphate environments which makes it ideal for coastal regions. This is a highly progressive cement offering better cohesiveness, superior workability and less water requirement than Ordinary Portland Cement (OPC).

SOCH KARO BULAND

JK Lakshmi Cement PPC (Blended Cement) provides more strength than the BIS specified 43 grade. With features like super-strength, higher fineness and corrosion resistance, It is an ideal choice. The best thing about JK Lakshmi Cement PPC is its consistency in quality, colour, strength, setting time, weight, etc.

Super Strength

Due to continuous conversion of liberated lime $[\text{Ca}(\text{OH})_2]$ into stronger C-S-H gel, the strength continues to increase with time.

Higher Fineness

Processed fly ash of uniform size, used in yielding JK Lakshmi Cement, ensures the fineness of its particles. This gives more cohesive and workable concrete.

Lower Heat of Hydration

Contains less C3A resulting in less heat evolution, leading to absence of cracks during hydration process.

Corrosion Resistant

Concrete made with JK Lakshmi Cement is impervious to chemicals and water. As water, chloride and other chemicals are effectively barred from contact with the reinforcements, concrete becomes corrosion resistant.

Better Workability

Superior quality and controlled processed spherical grain size fly ash results in concrete with increased workability, even at lower water-cement ratio. This results in more strength of concrete and reduces bleeding during concreting.

Sulphate Resistant

The $[\text{Ca}(\text{OH})_2]$ produced during hydration is highly susceptible to sulphate attacks. Perfectly processed fly ash reacts with $\text{Ca}(\text{OH})_2$ and converts it into C-S-H gel leading to sulphate resistant (moderate) quality.

UNMATCHED INNOVATION

JK Lakshmi PRO+ Cement is an innovative product that has transformed the realm of construction. Based on an analysis of worldwide trends and consumer insights of India, a team of dedicated professionals worked on formulation of this revolutionary product. With several positive connotation of "PRO" and multiple extra benefits symbolized by "+", PRO+ is an idea which is born and raised to inspire a sense of prosperity.

JK Lakshmi PRO+ Cement is equipped with unmatched cement technology and packed with 7 qualitative features.

Plus Durability

Micro Particle Strength Technology leads to dense & higher impermeable concrete which ensures high durability in constructions.

Plus Finish

Fine cement particles lead to better smoothness and superior finish.

Plus Speed

Early de-shuttering saves time and ensures a speedy construction process.

Plus Surety

High quality tamper proof and moisture resistant bags give correct quantity and factory-fresh quality of cement.

Plus Service

Timely delivery and an expert technical team for on-site guidance.

Plus Strength

With 20% higher early strength, JK Lakshmi PRO+ Cement offers plus Mazbooti.

Plus Economy

With 5% more volume per bag of cement, it requires lesser number of bags for construction.

”

FOR HEAVY DUTY CONSTRUCTION

Heavy-Duty performer is someone who wins every fight with strength and grit, who knocks out his opponents with incredible performance every time, lasts long with proven durability and withstands the challenges of the demanding usage. This Heavy Duty ability is a source of inspiration behind the design of a truly innovative Platinum Heavy Duty Strength Cement, which embodies heavy duty in each and every particle.

Right from the quality of limestone to enforcing world class production processes, Platinum Heavy Duty Cement is a blend of perfection and precision.

Premium Blended

Manufactured using high-quality premium raw materials, Platinum Supremo is a promise of strength and durability. Its Ad star packaging is tamper-proof, and assures easy handling and clean storage, making sure that every house built from this product has a strong roof.

Supreme Strength

- ▶ Long-term durability
- ▶ High early strength
- ▶ High-class 28 days strength

Supreme Bonding

- ▶ Particle packaging technology
- ▶ Strong grip on reinforced bars
- ▶ Highly Impermeable

Supreme Packaging

- ▶ Temper-proof Ad-star packaging
- ▶ Moisture resistant
- ▶ Weight assurance

Supreme Fineness

- ▶ More volume per bag
- ▶ Superior finishing
- ▶ Better workability

Supreme Services

- ▶ Fast sales service
- ▶ Guidance on all constructional matters
- ▶ On-site and virtual technical support

Blended

Platinum Heavy Duty Cement with high reactive fly ash, resists Sulphate and Chloride attacks. Thus, protects the reinforced bars from the menace of rust. The result being, your house remains fresh as ever and durable for years.

Rust Protection

Resistance to Sulphate and Chloride protects the steel bars, enhancing the durability and strength of the structure.

Superior Particles

Superfine particles lead to more volume per kg of cement with superior finish.

Long Term Strength and Greater Durability

Higher compressive strength, more impermeable as well as dense concrete made from this cement, contributes to greater durability of construction.

Superior Workability

Its superior spherical particles make concrete/mortar very easy to transport and place at the job site.

Superior Bonding

Due to the unique chemical composition and fine particles, it gives superior bonding on brick, concrete and stone masonry.

VALUE ADDED PRODUCTS & SERVICES

FOR BEAUTIFUL HOMES

JK Lakshmiplast is a superior quality gypsum plaster with exceptional whiteness that can do wonders for home interiors. From decorative cornices, ceiling flowers, ornamental columns to fire resistant cladding for structural steel work, JK Lakshmiplast is the most ideal solution. The use of modern and latest equipment and processes have ensured the removal of all impurities from gypsum plaster and you get a world class product.

- ▶ Fine particles enable better workmanship and more refined finish.
- ▶ Superior whiteness permits saving of painting cost and enables experiments with different new shades.
- ▶ Guaranteed quality and quantity.
- ▶ Laminated dust free and moisture proof packaging.
- ▶ Hologram on packaging ensures product's authenticity.
- ▶ Higher adhesive ability makes it ideal for wood, metal and masonry.
- ▶ Dissolves well and allows crack-free designs.
- ▶ Economical production and better coverage area.

FOR HAPPY WALLS

JK Lakshmiplast GypGold is a lightweight gypsum based plaster. It is suitable for hand or machine application to internal surfaces. After drying, it gives brilliant white, smooth and matt finish with good impact strength. JK Lakshmiplast GypGold consists essentially of gypsum hemihydrate formulated with special additives to control working and setting characteristics.

- ▶ Brilliant white, smooth & matt finish
- ▶ Fire & thermal resistance
- ▶ Direct application
- ▶ Light weight
- ▶ Excellent strength after drying
- ▶ Great bonding
- ▶ No water curing
- ▶ Economical

FOR SMART MODERN WALLS

JK Lakshmiplast Smart Wall Putty is a contemporary solution to cover unevenness and pin holes on surfaces. It is typically used as a filler/sealing agent and applied before painting of the wall in both internal and external applications. Being made from high purity white cement and high strength polymers, Smart Wall Putty gives a strong base to surface which prevents paints from flaking.

- ▶ Made from high purity white cement
- ▶ High strength polymer based
- ▶ Superior fineness
- ▶ Water resistant
- ▶ Prevents flaking of paints
- ▶ Excellent bonding increasing the life of paints
- ▶ Algae and fungi resistance
- ▶ Eco friendly
- ▶ Lead, oil or toxic material free
- ▶ For both interior & exterior surfaces

FOR SMART CONSTRUCTION

JK Lakshmi Power Mix is made of high-end concrete technology. It is the perfect blend of aesthetic qualities that result in high standard of construction. With the introduction of such path breaking innovation in the realm of building materials, architects and individual house builders are independently creating textures, surfaces and shapes that were complex and impossible to create before.

7S Advantages:

- ▶ **Smart Structure:** It gives superior strength, enhanced durability, enhanced abrasion, thinner structural elements, aesthetic visual impact, better surface finish and texture. No hassle of procurement and quality testing of raw materials for concrete.
- ▶ **Service:** High quality pretested ready-mix concrete delivered right up to your door step for just-in-time constructions. A large, safe and well-maintained fleet of transit mixtures and support of service engineers for guidance on every step of construction.
- ▶ **Savings:** Reduction of wastage and pilferage of material leading to elimination of construction time, cost optimisation and focused construction planning. Savings of approx. 15.5% in construction cost as compared to regular mix concrete.
- ▶ **Selection:** A wide variety of sub products according to customers' specific application and usage. Efficient handling of raw materials lead to long-lasting and low maintenance concrete, offering a perfect value equation.
- ▶ **Standardisation:** Systematic manufacturing cycles and adherence to global standards of quality. Guarantee of quality assurance and consistent results.
- ▶ **Speed:** Easy adaptability to on-site changes and on-time scheduling. Faster start up due to minimal lead time in ordering of materials. Earlier occupancy of building due to faster construction.
- ▶ **Safety:** Avoids hazardous emissions from mixing. Migration to newer technologies of construction lead to safer work environment and better work site productivity.

FOR SUSTAINABLE BUILDINGS

The use of Autoclaved Aerated Concrete (AAC) blocks is continuously growing as an easy, convenient, safer, superior and environment friendly green building material replacing commonly used conventional clay bricks. JK Smartblox are produced in a state-of-the-art plant with German machinery and technology incorporating technological innovations such as 'Green Separation' and 'Horizontal Autoclaving' capable of delivering unmatched consistency in product quality. It not only delivers unmatched speed, quality and economy of construction, but also provides energy savings, low maintenance cost, safety, health and hygiene of users.

Smart Benefits

- ▶ Upto 3 times faster construction
- ▶ 3 times lighter
- ▶ Extra strength
- ▶ Over 20% energy savings & cool
- ▶ Dimensional accuracy
- ▶ Sound insulation
- ▶ Upto 15% savings of steel
- ▶ Fire resistance
- ▶ Pest & termite resistance
- ▶ Moisture resistance
- ▶ Earthquake safety
- ▶ Green building points/Eco-friendly product
- ▶ Economical construction
- ▶ Superior thermal insulation

PURE WHITE, BRILLIANT WHITE

Through the continuous development in our R&D centers to offer aspirational products to our customers, we at JK Lakshmi Cement Ltd have developed white portland cement in line with IS8042:2015 requirements.

JK Lakshmi Smart White Cement gives the finest whiteness with the smoothest finish and can be used on all internal and external surfaces.

- ▶ 0% Dolomite Added
- ▶ Brilliant White
- ▶ High Refractive Index

- ▶ Superior Fineness
- ▶ Water Resistant Packaging

BUILDING A FUTURE IN SMARTEST WAY

JK Lakshmi 'Smart Serv' Cement is another superior example of JK Lakshmi Cement's innovative solutions. A unique concept that promises to fulfill new age construction needs. This no-cost, premium service is equipped with features like a GPS tracker, quality check sensor, anti-theft lock, and much more. This funnel-shaped movable silo can store up to 5-7 tons of cement. It is an excellent replacement for cement bags. Perfect for sites of 2000 sq. ft. area or above.

A photograph of two men in a professional setting. One man, seen from the back, is wearing a white shirt and glasses. The other man, facing him, is wearing a light blue button-down shirt and has a beard. They are shaking hands over a wooden desk. On the desk, there is a laptop, a small potted plant in a white square pot, a blue pen, and some papers. The background is a textured wall. A yellow rectangular frame is overlaid on the image, with two diagonal lines extending from the top-left corner.

CUSTOMER CENTRICITY

**ENSURING
CORPORATE LEADERSHIP**

CUSTOMER CENTRIC COMMUNICATION

‘Customer First’ is the mantra that laid the strong foundation of our growth story, making us the most trusted and preferred cement brand across our markets. To reach them in every possible way, satisfy them with superior products & services, gather their valuable feedback and take every step for retaining them is our philosophy. Our future readiness stems from our customer-centric culture.

To make sure that the brand stays in the top of the mind of our customers, a well balanced approach towards the brand building has been adopted by JK Lakshmi Cement. Mass media campaigns and high impact sponsorship associations have resulted in high brand equity.

<https://youtu.be/1v95ZsNJXbU>

CUSTOMER CONNECT

Strong focus on various BTL activities has complemented our mass media efforts resulting in high brand visibility, awareness and recall. To get closer to our customers, various customer engagement programs have also been undertaken over the years. We try to reach out to prospective customers in various ways with site demos, road shows, exhibitions, fairs or promo vans where their queries related to various construction related topics are taken care of.

An Integrated Rural Micro Marketing Approach and a slew of on ground activities on continuous basis in various states across India, have resulted in an increased rural base for our brand. A pioneer attempt has been our 'Sambadh Programme' where the local representatives or 'Sahayak / Foot Soldiers' collaborated and become our brand ambassadors.

To take advantage of rapidly shifting business opportunities, leap ahead of the competition, garner respect and have a positive connect with country's youth and upwardly mobile consumer segment, JK Lakshmi has embraced the mantra of 'Go Digital'. This focus gets reflected in the many lacs of likes on our Facebook page. We constantly strive to interact with our future customers and current followers through innovative exciting campaigns, relevant content and engaging contests.

CONSTRUCTION SOLUTIONS

Continuing on the company's focused strategy to educate, engage and empower its customers, JK Lakshmi Cement has a full-fledged technical service cell consisting of a well-equipped Hi-tech laboratory and highly qualified civil engineers with vast experience in cement and concrete technology.

The engineers of the technical service cell are always available for guidance and detailed mix designs to meet the needs of our valued customers.

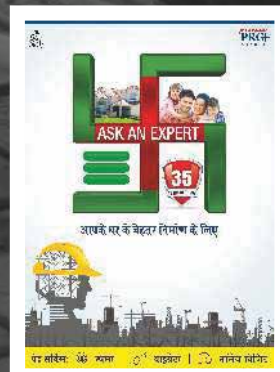

On the Spot Assistance

To provide construction solutions to its customers, the cell came up with mobile labs that can reach the construction site and provide on-the-spot assistance. It carries out regular and innovative contact programmes with Individual House Builders (IHB), masons and business associates to keep in tune with their needs and requirements.

Meet the User

To get feedback from our end customers on our products and services, various initiatives like awareness camps, IHB meetings, site guidance, road shows, and 'Ask an Expert' sessions were organized. These gave us opportunity to have a face to face interaction with the customers, solving their queries and striving to deliver better solutions in future.

“ STRENGTHENING BOND WITH DEALERS

Our dealer network forms the backbone of our success story and constitutes the most important vital link in the supply chain. We continuously look for newer ways to energize, revitalize and motivate them to enable them to discharge their strategic role effectively. These include plant visits and training sessions for the enrichment of their skills. We were the first cement company to introduce a loyalty program for our dealers.

INFLUENCER' ENGAGEMENT

We always strive to connect better with the influencer fraternity like architects, construction consultants, engineers, contractors and masons by organizing numerous knowledge sharing sessions on relevant and contemporary themes which enable us to provide a platform for healthy interaction, spreading awareness and information so they could be equipped better to face the challenges in shaping the future of India. Our loyalty program for contractors and masons is considered among the best in the industry.

Our more than 2 decade old, Sahayogi Sanrakshan Club was the first in industry to provide an insurance sum of 2 lacs to masons under which they are covered against accidental death and/or permanent disability, total or partial.

The club also provides them with adequate benefits at regular intervals like organising training programmes, skill enhancement camps, Sanjeevani Health Camp and JK Lakshmi Vidya Camps - special scholarship assistance for girl education.

CORPORATE SOCIAL RESPONSIBILITY

ACHIEVING HARMONY WITH THE COMMUNITY

JK Lakshmi Cement Ltd. is committed to community engagement via the adoption of an effective CSR approach and partnerships through myriad interventions in the peripheral areas of its establishments. Embedded in our long-term business strategy, we believe that business priorities co-exist with social commitments that drive holistic development of people and communities.

The major CSR thrust areas of the organisation are Healthcare, Water & Sanitation, Education, Environment Sustainability, Skill Development - Livelihood & Community Development. Apart from the vocational training, other key interventions have been to support vulnerable groups in the product supply chain like truck drivers, loaders, masons, and petty contractors through various benefitting projects.

Various CSR activities initiated by JK Lakshmi Cement Ltd. are :

Health Camps | HIV/AIDS Awareness | Dental Camps in Government Schools | Adult Literacy | Project Aarambh | Hostel Accommodation | E-Learning & Computer Classes | Silai Kadhai Training | Mobile Repairing | Beautician Training | Livestock Development | Seed Distribution to Farmers | Self Help Groups

Adult Literacy

Healthcare

Skill Development

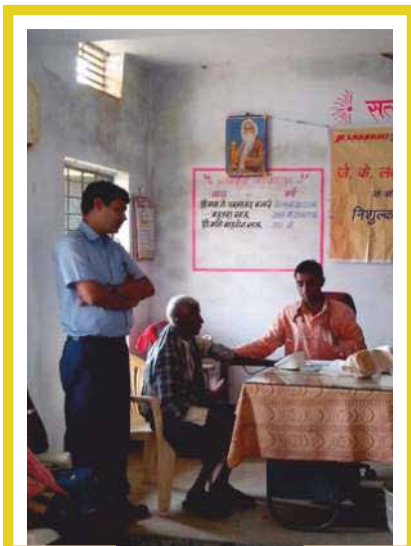

Sustainability

Women Empowerment

Sanitation

JK Lakshmi Cement Ltd. is fully dedicated towards creating a better environment around its factories for the workers and their families. Which they have been able to achieve by working towards prevention of air, water and land pollution.

WHERE CARING PARTNERS GROWTH

'Our people are our biggest strength' - the words we live by at JK Lakshmi Cement Ltd. We have always believed and will continue to believe in 'our people are our greatest assets'. Augmenting our human capital and investing in our people towards their all-round development has been our passion. The Company has endeavoured over the years to create an environment which encourages the individual passion in tandem with the team-spirit. An environment that has fair clear-cut HR Policies, breeds self-starters, infuses empowerment, provides opportunities, creates challenges, gives training, rewards the deserving and provides a clear-cut growth path is what defines the organisation set-up of JK Lakshmi Cement Ltd.

Our initiatives towards enhancing our human capital have been recognized and appreciated not only within the industry but also in the business world. Company was recognised as 'Best in the Industry: Manufacturing and Production 2018' by Great Place to Work Institute India.

JK Lakshmi Cement made it to the Business Today's list of 'Top 25 Coolest Places to Work For' and Times Ascent 'dream Companies To Work For' 2021 In Cement Sector. JK Lakshmi Cement Ltd. is the highest ranked Cement Manufacturing Organization in the list of Top 100, and amongst the Top 5 Manufacturing and Production Organizations in the list. The company also won globally reputed 'ATD Best Award' from Association for Talent Development, USA (erstwhile American Society for Training and Development) for its commendable efforts and practices in building and nurturing talent through multiple interventions including training and development initiatives.

AWARDS & ACCOLADES

PURSUIT OF EXCELLENCE IN EVERY ENDEAVOUR

As a company, JK Lakshmi Cement, is constantly striving to exceed industry's benchmarks in product quality and customer service with inspiring ideas and innovations. JK Lakshmi Cement Ltd. holds the reputation as the most esteemed cement manufacturer of Northern India comprising numerous awards to their name in HR, Production, Quality, Marketing, Leadership and many more other areas.
