HEAVY DUTY PERFORMANCE - OUR INSPIRATION

Heavy duty performer is someone who wins every fight with strength and grit, who knocks out his opponents with incredible performance every time, lasts long with proven durability and withstand the stresses of demanding usage. This heavy duty ability is a source of inspiration for us. That's why we have designed a truly innovative cement which embodies heavy duty in each and every particle.

At JK Organisation, it is our relentless pursuit to focus on minor details that go behind building your dreams. We always strive to bring you products that adhere to global standards, conform to your needs and deliver beyond your expectations.

Our latest offering to you, Platinum Heavy Duty Premium Cement is nothing but our steadfast obsession towards backward quality control. Right from paying attention towards the limestone quality to enforcing world-class quality control measures in production processes, we have taken utmost care to bring you the best.

Also, we took care for the addition of special chemicals during the blending of high reactive fly ash. With the faultless installation of machines equipped with 'PSD Technology', we have ensured a better quality product. Platinum Heavy Duty is a modern cement with high reactive fly ash and short discrete fibres.

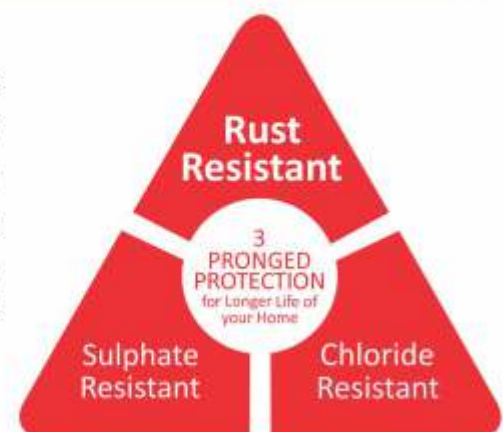

To ensure the prevention of cement from wastage, theft and leakage, we have selected an exceptional 'Ad-Star' packaging with superior qualities like tamper and moisture resistance.

Blending in with utmost perfection, precision and satisfaction; JK Lakshmi Cement Ltd. is proud to present, the new indigenous **PLATINUM HEAVY DUTY PREMIUM CEMENT**.

RUST RESISTANT, RELIABLE CEMENT

Sulphates and chlorides are the biggest enemies of reinforced bars (steel/sariya). They cause the rusting of these bars and deteriorate them over the years resulting in reduced strength and durability of structures.

Platinum Heavy Duty Premium Cement with high reactive fly ash, resists sulphate and chloride attacks. Thus, protects the reinforced bars from the menace of rust. The result being, your dream house remains fresh as ever and durable for years.

BUILD WITH BENEFITS

PSD TECHNOLOGY

- More volume per bag
- High early strength
- Better workability
- Speedy construction
- Superior finishing
- More coverage in less effort
- Dense concrete
- Long-term durable structure

ADDED FIBRES

- Reduced shrinkage cracks
- Superior bonding on re-inforced bars
- Minimum rebound loss and less wastage

WORLD CLASS PACKAGING

- Moisture resistant
- Multi-coloured & attractive
- Weight assurance
- Tamper proof

RULES FOR BETTER RESULTS

- Excess water is like poison for the concrete. Use maximum 26 liters of water per bag.
- Use cover blocks (spacers) for keeping bars in position, increasing durability of structure and fire resistance.
- Use vibrator for increasing the strength of concrete (upto 25%).
- Use shuttering tapes to prevent the leakage of slurry from fresh concrete.
- Curing:
 - Use only clean water for curing.
 - Start curing as soon as the concrete hardens i.e. no nail/thumb impression on freshly laid concrete.
 - Proper curing should be done for 7-10 days.
