

WATER RESOURCE MANAGEMENT POLICY

Title	Water Resource Management Policy
Version Number	1
Effective Date	1 st May 2023
Authorised By	President & Director
Number of Revisions	-
Last Revised Date	-

The Company recognizes that water resource is critical for supporting ecology, life and productive processes and is an important issue currently affecting the planet. We comprehend the risk of dependence on water resources that have competing users including ecological systems. We are committed to take actions within our business and value chain and work with our stakeholders to find long-term solutions to reduce our water consumption and preserve the functional support of water resources that we impact.

The Company is committed to:

- Minimize our impact on water resources from operations by measuring and understanding water use, management and wastewater discharge.
- Reduce freshwater consumption by re-use and recycling water.
- Promote continuous performance improvement of water management across the Company's supply & value chain through effective and economically viable management systems.
- Promote innovative use of water and best practices towards careful sourcing, use & conservation of water resources.
- Maintain statutory legal compliance for water related laws and regulations.
- Involve our employees and contract workers in water conservation initiatives.
- Engage with our stakeholders and communities to increase their awareness on the responsible use of water and involve them in protection/ regeneration of water resources.
