

CYBER SECURITY POLICY

Title	Cyber Security Policy
Version Number	3
Effective Date	15 th May 2023
Authorized By	President & Director
Number of Revisions	2
Last Revised Date	1 st April 2021

Purpose: The purpose of this policy is to ensure the confidentiality, integrity, and availability of our Company's information assets, while reducing the risk of unauthorized access, disclosure, or destruction of Company data. This policy establishes guidelines for Employees and Business Partners who access, use, or handle Company information systems and data.

Scope: This policy applies to all Employees, Customers, Vendors who access Company information systems and data, including but not limited to email, network systems, and data storage devices.

- 1. Access controls:** Access to Company information systems and data will be granted based on the principle of least privilege, which means that employees and business partners will only be granted access to the systems and data they need to perform their job duties. Access to Company systems and data will be controlled through the use of strong authentication and access controls, including password policies and two-factor authentication where feasible.
- 2. Data protection:** All Company data, including personally identifiable information (PII) and intellectual property, must be protected from unauthorized access, disclosure, or destruction. This includes implementing data encryption, implementing physical and logical access controls, regular backup and recovery processes, and limiting the use of portable storage devices.
- 3. Network security:** Company networks must be secured to prevent unauthorized access and to protect against cyber-attacks. This includes using
