Part - "C"

Pollution discharged to Environment/unit of output (Paramteres as specified in the Consent issued)

<u>Pollutants</u>	Quality of Pollutants Discharged Mass/Day	Conc.of Pollutants in disch(mass/Vol.)	Percentage of variation from prescribed standard with Reasons.
<u>a) Water</u>			
I) Industrial	Nil	Nil	Nil
II) Domestic	Nil	Nil	Nil

Note:

The domestic effluents generated are treated (100%) in Sewage waste Treatment Plant (STP) & treated effluents are reused (100%) in cement plant for industrial Cooling purpose and therefore no waste water is discharged. Waste water from WHR is being recycled in cement plant. STP details are attached vide annex-"B"

b) Air : Stack emission

Stack attached to	Quantity of SPM discharged, Kg/Day	Conc.of SPM discharged, Mg/Nm ³	Percentage of variation from prescribed standard with Reasons.
Boiler ESP Stack	Not Applicable		

Part "G"

Impact of Pollution Control measures on conservation of natural resources and consequently on the cost of production.

M/s JK Lakshmi Cement Ltd Installed Air Cooled Condensor in 15 MW WHR CPP inspite of Water Cooled Condensor. Reduction of water consumption is three times lesser with Air cooled condensor and no cooling waste water is generated. Waste water is being treated with necessary neutralize tretament and treated water is being used in industrial cooling in own cement plant.

Part "H"

Additional measures/investment proposal for environmental protection including abatement of Pollution, prevention of pollution

It is a waste heat recovery based power plant. It conserves natural resources like fossil fuel by utilization of waste heat from Pre-heater and Cooler. Moreover, it reduces CO2 emissions into atmosphere due to combustion of fossil fuel and water consumption utilized in cement manufacturing process.

Part "I"

Any other particulars for improving the quality of the environment.

In WHR CPP power is generated from waste heat of Kiln's sections. Air cooled condensor installed for cooling purpose.

Part "D"

Hazardous Waste

As specified under Hazardous Waste (Management, Handling & Transboundary Movement) Rules, 2008

Hazardous Waste: Used Oil Category 5.1 as per schedule - 1 of H & OW (M & TBM) Rule, 2016
